PROFESSIONAL SUMMARY

Detail-oriented Java Software Tester with hands-on experience in manual testing, automation testing, API testing, and performance testing. Demonstrates strong analytical thinking, attention to detail, problem-solving, and communication skills while collaborating with cross-functional teams to deliver high-quality, reliable, and scalable applications in Agile environments.

EDUCATION

Savitribai Phule Pune University *Pune, India*
MCA (Master Of Computer Application) Sep 2024 - June 2026
CGPA: 8.28/10

Dr. Babasaheb Ambedkar Marathwada University *Chatrapatti SambhajiNagar, India*
Bsc Computer Science July 2020 - June 2023
CGPA: 7.74/10

Kulbhushan Junior College *Chatrapatti SambhajiNagar, India*
Higher Secondary Education (Class XII) May 2018 - May 2020
Percentage: 66.15%

Shri Sharda Mandir Girl's High School *Chatrapatti SambhajiNagar, India*
Secondary Education (Class X) June 2008 - May 2018
Percentage: 77.20%

SKILLS

Testing Skills: Manual Testing, Automation Testing, API Testing, Regression Testing Behavioural Testing, Functional Testing, Smoke/Sanity Testing, Integration Testing, Test Execution, Test Reporting, Test Case Design, Defect Tracking, Test Documentation
Tools & Technologies: Selenium WebDriver, Postman, JIRA, JUnit, Git, Excel, CI/CD, REST APIs
Programming & Databases: Java, MySQL, Postgres, Python, SQL
Frontend: HTML5

CERTIFICATIONS

- Programming in Java (NPTEL)
- Introduction to Selenium (Intelllipat)
- Postman Student Expert (Postman Academy)

EXPERIENCE

JADE (JSCOE Association for Developing Entrepreneurs) *Pune, India*
Java Testing Intern Dec 2025 - Present

- Tested ERP internship management workflows across 6+ functional modules to ensure system accuracy and reliability
- Executed 120+ manual, automation, and API test cases using Selenium WebDriver and Postman with 95% pass accuracy
- Identified, logged, and tracked 40+ defects in JIRA while validating fixes during regression cycles
- Collaborated with 5+ developers to reduce rework cycles and improve release stability

Infosys *Pune, India*

Software Engineer Intern Nov 2025 - Jan 2026

- Performed functional, data validation, and regression testing on applications processing large datasets
- Validated Python-based data science workflows and verified model outputs for consistency and correctness
- Tested Streamlit-based applications to improve usability, performance, and error handling
- Assisted in identifying edge cases and improving overall test coverage during development cycles

PROJECTS

Meal Mitra (Smart Food Donation Webapp) (Link)

- Validated frontend and backend workflows including food donation, NGO verification, and role-based access control
- Executed functional, integration, and regression testing across Donor, NGO, and Admin modules
- Verified database updates and API responses to ensure data consistency across the platform
- Coordinated defect reporting and fix verification to ensure smooth feature deliver

Load & Stress Testing of User Authentication & Session Management (Link)

- Designed and executed load and stress tests for authentication and login APIs
- Simulated up to 500 concurrent users under peak load conditions with response times under 2 seconds
- Analyzed throughput, error rates, and latency to identify performance bottlenecks
- Documented test results and actionable findings to support scalability improvements

ACHIEVEMENTS

- Completed Hacktoberfest by contributing multiple quality pull requests to open-source projects, demonstrating initiative, consistency, and collaboration.
- Recognized as a Postman Student Expert
